

FISH POPULATION DYNAMICS AND THE FAMS SOFTWARE PROGRAM

PRESENTED BY DR. JEFF SLIPKE

About the Workshop:

- Half-day, interactive training session
- Provides an overview of the FAMS software to evaluate exploited and recreational fisheries
- Analytical procedures will focus on estimating recruitment, growth and mortality, and the integration of these processes will be presented through modeling population dynamics from actual case histories
- A familiarity with fish population dynamics would benefit those attending
- Although not a necessity, attendees are welcome to bring a laptop with the FAMS software loaded
- It is recommended that attendees bring either a hard copy or pdf of the FAMS manual

February 4, 2019 1-5 pm
Steinhart Lodge,
Nebraska City, NE

- Workshop cost \$85 (breakfast the following morning is included)
- To reserve your spot in the workshop, email or call Jordan Katt
- Jordan.katt@nebraska.gov
- 402-405-4582
- Space is limited, reserve your spot today
